

What other support is available for my child?

To look at all the support available please read our 'Parents Guide to Support'

In addition to outstanding teaching we also offer additional one to one or small group work for pupils who may or may not have a Special Educational Need. We aim to use programmes that are proven to help progress children's learning as recommended by the Department for Education.

'Catch up' is a thing where us fantastic, smart and adventurous kids have a little bit more time at English and or maths. catch up is really fun and it really helps us. We learn a bit more of what we have learnt in class and we work on the personal things we need to. Catch up is one to one so you can learn at your own pace. Children will no longer be scared of maths or English!

We know our extra support has a huge impact but don't just take it from us - here's what our pupils have to say!

Our Terrific teachers give us awesome spelling groups! They are fun and educational and I have learnt so much! It is a different way of learning that is easier for me and really enjoyable.

The 5 minute box is really fun it can teach you maths and English. It's a booster for my learning and helps me feel confident.

I like Fischer Family Trust because it helps me with my sentences and it makes me feel happy! My mummy is impressed with my sentences. I like the teaching assistants who help me because they are fun!
